OBJECTIVE

I'm a curious person, a free thinker with a clear, logical mind and a practical approach to problem-solving. From the moment when I made my first simple website, I knew I was hooked into the world of software development. I decided to get a formal education in this direction and structure my self taught knowledge. Below you'll find projects I've completed that will showcase my current skills.

SKILLS

VueJs Javascript CSS HTML

GIT SASS

Design:

Photoshop Illustrator AdobeXd

Wireframing Prototyping

Language: Polish - native, English - proficient

EDUCATION

Dublin Institute of Design

SEP 2015 - SEP 2017, 45 Kildare St, Dublin 2

WROCŁAW, POLAND

Experimental Physics

AWARD

Student of the Year - 2017

Dublin Institute of Design

EXPERIENCE

Invoice App [↗](#)

Application made in VueJs with State management and integration with Firebase to get access to the database. You can create, delete, edit & update invoices. I styled this application with tailwindcss.

Pomodoro [↗](#)

Customizable pomodoro timer made in VueJs. Utilizing progressive bars for visualization and dynamic transitions of the state of the timer. Styled with the use of scss.

Budged App [↗](#)

The budget app is a vanilla javascript application where you can create a simple budget breakdown of your income and expenses. Styled with scss and the use of Materialize.
